Freya	Katelyn Waggoner, D.V.M.	Exam	2/15/2024	1	\$75.00	\$0.00	\$75.00
-------	--------------------------	------	-----------	---	---------	--------	---------

Many horses on Julie's place have been hyporexic over the last two weeks, since Elias came in for a colic episode and then broke with a fever later that week. They mostly are not eating alfapro, but will eat hay. Freya didn't want to eat hay or any feed at all today, and she was laying down yesterday.

On exam, HR 40, RR 32 (sniffing), good gut sounds, T 97.0, normal lung sounds, slight tracheal rattle, MM pink and moist, CRT <2. They have seen her pass feces. Bloodwork shows mild elevation in GGT, marked elevation in AST, and elevated TBIL, as well as elevated globulins, though her SAA is 0.

-------	--------------------------	------	-----------	---	---------	--------	---------

Maise was recently acquired from Bowie horse sales about a week ago. She has since come up with a snotty nose, but she is still eating and is afebrile.

On exam, HR 36, RR 32 (sniffing), quiet gut sounds but did pass feces in the trailer, T 99.2, normal lung sounds, increased tracheal rattle, bilateral mucopurulent discharge, bilateral mild ocular discharge.
